

# Urban and rural heritage role in Italian small towns affected by incoming threat and traumatic event

## *Abbiategrasso in Ticino Park (north Italy)*

The landscape of the marcita meadows: heritage at risk

In this area a traditional agricultural productive technique, the marcita (in Italian), has been developed that is at risk of disappearing due to over-industrialization and construction of new infrastructures.

The open-heritage.eu platform has been created in the frame of the REACH project [www.reach-project.eu](http://www.reach-project.eu)

The REACH project received funding from the European Union's Horizon 2020 research and innovation programme, under grant agreement No 769827
